

Wireframe Detalle de producto Desktop-tablet-mobil

The desktop wireframe displays a product detail page for a Logitech G403 mouse. The main image shows the mouse from a top-down perspective. To the left, there's a sidebar with three smaller images of other mice: a white and black model, a red and black model, and a black model. Each has a "Preorder" button and an "EXPLORE MORE" link. Below the main image, there's a title "Intel Core I3 12100F (S/Video)", a "Descripcion" section with bullet points about the brand (Logitech), price (\$30.00), and weight (93g), and a "Añadir al carrito" button. At the bottom, there are social media links for Twitter, Instagram, Facebook, and LinkedIn.

The tablet wireframe shows the same product detail page as the desktop version. The main difference is the layout, which is more compact and optimized for a smaller screen. The product image, title, description, and add-to-cart button are all present, along with the social media links at the bottom.

The mobile wireframe presents the product detail page in a highly condensed form. It includes the main image, title, price (\$30.00), a brief description, and a "Comprar" button. A "User" icon is visible in the top right corner, with a callout showing "User.name", "User.mail", "User.location", and "User.direction".
